

Artisan IT SERVICES

IT Leadership and Cybersecurity for those who serve others!

A Career of First-Hand Experience with the Diocesan Schools & Parishes

Hi, My name is Erik!

"I understand the unique reality of serving a combined school and parish community, with the shared staff, shared budgets, and shared mission that come with it."

My connection to the diocesan schools goes back further than my career. It goes back to grade school. I started doing informal tech support at Holy Spirit as a student, long before I knew it would become my profession. That early start carried into my senior year, when I became an IT Intern at Memorial High School through the SICTC computer networking program. Since then, I've served the schools in nearly every IT capacity there is: tech support, systems engineer, IT director, and almost everything in between. Beyond Memorial, I've served Rivet, Flaget, Resurrection, and Good Shepherd. My passion for serving these schools and the mission of Catholic education has stayed with me at every step.

One Local Partner...

Tech & Security Handled...

Managed IT and Helpdesk

Day-to-day support for your staff.

-

Proactive maintenance so small issues don't become big disruptions. Keep your Network, Systems, WiFi, Servers, and Devices optimized for the needs of your school or parish.

Cybersecurity Covered

Protecting sensitive student, staff, and parishioner data from breaches. Cracking down on phishing.

-

Protecting day to day operations and budgets. Keeping students safe online, on task, and parents informed.

Compliance Made Easy

Aligning your tech and cybersecurity with COPPA, FERPA, CIPA, Cyber Insurance Requirements.

-

Keeping you eligible for E-Rate funding. Helping you avoid violations, fines and help you access funding.

Security & Visibility

Clear camera visibility across your campus to keep students and staff safe.

-

Smart alerts on persons of interest, unusual activity, and defined events, so your staff can catch safety concerns before they become bigger problems.

Campus Secured

Door and entry security that keeps your campus secure to keep those who belong in and those who don't out.

-

Environmental sensors that detect and alert on what eyes and ears can't.

Communication and A/V

Reliable, modern phone systems for offices and classrooms, including mandated E-911.

-

Paging, sound, bell systems and interactive classroom displays that support both daily instruction and emergency communication.

Technology Advisory (vCTO)

Ongoing guidance on budgeting, compliance, and technology decisions so you have a trusted advisor instead of a list of vendors to dig through. No need trying to figure out whose responsibility is what. It is all handled for you.

Unified Technology Procurement

A few times a year, I will help participating Evansville diocesan schools pool together for bulk pricing on the technology they already need, saving money no single school could get alone.

Why I Started Artisan IT Services

Months before starting Artisan IT Services, I had begun surrendering my career path to God, sensing I was being called to take a leap of faith. While praying in the Adoration Chapel at St. John the Baptist, I found myself reading about the life of St. Joseph, how he did whatever was needed, no matter the risk, to serve and protect the Holy Family. Starting a business felt like that kind of risk, and I knew I was ready to answer the call for my own family the same way. That was the moment I knew this business was what I was called to do.

I named the company after St. Joseph, the patron saint of artisans and workers, a skilled craftsman himself. That same standard of skill and faithful service is what I strive to bring to every school and parish I serve.

My own children will attend diocesan schools, so this work is personal to me in more ways than one.
